

CMC Seminar: SPONSORSHIP INFORMATION

2018 CMC Seminar
Ningbo, China
October 29th & 30th 2018

Seminar Overview

The Critical Materials Council (CMC) Seminar is a 1-day event providing actionable information on manufacturing supply-chains for current and future semiconductor materials. Seminar speakers will present perspectives on vital manufacturing issues associated with logistics, quality, and safety of materials needed in IC fabs. This event will be held in Ningbo, China and will be a joint event together with the ICMTIA, the Chinese IC Materials Technology membership group consisting of Chinese materials and equipment suppliers and fabs.

Sponsorship Levels

Members Only Reception - \$3.5 (limit 5)	Gold- \$2.2K

ABOUT CMC: The Critical Materials Council (CMC) of Semiconductor Fabricators (CMCFabs.org) is a membership-based organization that works to anticipate and solve critical materials issues in a pre-competitive environment. The CMC is a unit of TECHCET.

ABOUT TECHCET: TECHCET CA LLC is an advisory service firm focused on process materials supply chains, electronic materials technology, and materials market analysis for the semiconductor, display, solar/PV, and LED industries. Since 2000, the company has been responsible for producing the SEMATECH Critical Material Reports, covering silicon wafers, semiconductor gases, wet chemicals, CMP consumables, Photoresists, and ALD/CVD Precursors. For additional information about these reports or about CMC Fabs membership or associate-membership for suppliers please contact Diane Scott at info@cmcfabs.org +1-480-332-8336, or go to www.techcet.com or www.cmcfabs.org.
